- L6 ANSWER 58 OF 59 MEDLINE on STN DUPLICATE 26  
AB Human astrocytoma cells were studied using whole-cell patch-clamp  
recording. Voltage-dependent outwardly-rectifying anion currents were  
identified in primary cultures of six freshly resected human brain  
tumors and in seven established anaplastic astrocytoma/glioblastoma cell  
lines (U251MG, CH235MG, U373MG, U105MG, D54MG, SK-MG-1, and STTG1). Anion  
currents were not observed in normal, non-neoplastic glial cells, nor in  
human tumor-derived cells of non-glial origin (melanoma, breast  
cancer, neuroblastoma, rhabdomyosarcoma). Currents activated at  
potentials > 50 mV and showed large transients upon termination of voltage  
steps. Currents reversed at the predicted equilibrium potential for  
chloride ions and could also be recorded when Cl<sup>-</sup> was replaced by F<sup>-</sup>, Br<sup>-</sup>  
or I<sup>-</sup>. Currents were inhibited by the Cl<sup>-</sup> channel blockers  
chlorotoxin, DIDS, and DNDS. These Cl<sup>-</sup> currents may play a role  
in the growth control of astrocytoma cells.

L6 ANSWER 59 OF 59 MEDLINE on STN DUPLICATE 27  
AB Human astrocytoma cells were studied using whole-cell patch-clamp recording. Voltage-dependent outwardly-rectifying anion currents were identified in primary cultures of six freshly resected human brain tumors and in seven established anaplastic astrocytoma/glioblastoma cell lines (U251MG, CH235MG, U373MG, U105MG, D54MG, SK-MG-1, and STTG1). Anion currents were not observed in normal, non-neoplastic glial cells, nor in human tumor-derived cells of non-glial origin (melanoma, breast cancer, neuroblastoma, rhabdomyosarcoma). Currents activated at potentials > 50 mV and showed large transients upon termination of voltage steps. Currents reversed at the predicted equilibrium potential for chloride ions and could also be recorded when Cl<sup>-</sup> was replaced by F<sup>-</sup>, Br<sup>-</sup> or I<sup>-</sup>. Currents were inhibited by the Cl<sup>-</sup> channel blockers chlorotoxin, DIDS, and DNDS. These Cl<sup>-</sup> currents may play a role in the growth control of astrocytoma cells.
